

Solution-Sheet

Q1) Check if interconnection of devices on net is explained.

Types :- LAN, WAN, MAN . Any two .

Q2) Imaginary model to help network understand.

Q3) TCP is more reliable but slower. Examples are HTTP.

UDP is less reliable but faster. Examples are Streaming.

Q4) Unique identity for all devices.

Q5) Bandwidth is maximum data transfered rate (bps).

Q6) check for all names:-

- 1) Application layer
- 2) Presentation layer
- 3) Session layer
- 4) Transport layer
- 5) Network layer
- 6) Data link layer
- 7) Physical layer

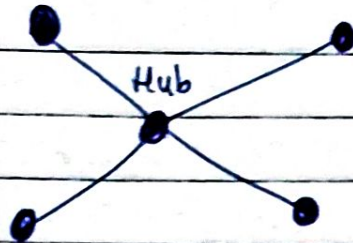

All these names should be present. The order should be compulsory the same as mentioned.

deduce marks as 1.5 for each name missing

Q7)

Star topology :-

A centered hub with devices around it only connected one center hub directly.

Ring topology :

A circular structure of devices which are connected in a ring fashion.
